

## Kufferath presents new products at Trade fair Productronica in Munich

Moers, Oktober 15th, 2021 - The Trade Fair Productronica starts again from November 16<sup>th</sup> to November 19<sup>th</sup>, 2021. The global manufacturer of wiring testing systems, Kufferath Group, will join this event the 3<sup>rd</sup> time and will present together with Creasoft, Spain, their latest products for a big variety of testing systems. For almost 25 years, the name Kufferath stands for professional and reliable testing technology in the field of car electrical systems.

During the Trade Fair Productronica Kufferath presented its complete portfolio of testing technology in the field of low voltage and high voltage for on-board electrical systems in the field of automotive technology / cars with internal combustion engines and electric drives. The cable test systems are available in a voltage range up to 7 KV.

The Productronica trade fair is always a very important event to meet Kufferath internally worldwide and to warmly welcome all customers present.

We are sure that 2022 will be a better economic year and we look forward to it with our customers. An impulse is definitely coming from Munich, the Productronica trade fair!
